EDUCATION

MITS-DU

Bachelor of Technology in Electronics and Telecommunication (CGPA: 8.20)

Gwalior, MP

Sep. 2023 – May 2027

EXPERIENCE

OM ADVANCE BAJAJ PVT.LTD

Remote

Full Stack Developer Intern

May 2026 – Present

- Engineered and deployed several high-performance, end-to-end web applications leveraging **React**, **TypeScript**, **Tailwind CSS**, and **Supabase**.
- Architected **SmartReceipt**, a premium automotive sales billing and receipt manager on **Cloudflare Pages/Workers** with **Hono**, generating **5,000+ receipts monthly** with synchronized debit/credit ledgers.
- Developed **Commflow**, the official company-wide internal communication portal utilizing high-fidelity glassmorphic dashboards, seamlessly serving **30+ active daily users**.
- Designed relational PostgreSQL database schemas with indexed views for stock management and chassis matching, improving data fetch speeds and reducing query complexity.

PROJECTS

SmartReceipt — Automotive Billing System | [LINK](#)

May 2026 – Present

- Engineered a premium, high-performance automotive sales billing portal using **React**, **TypeScript**, **Hono**, and **Supabase**, deployed serverless on **Cloudflare Pages**.
- Developed an optimized backend utilizing Cloudflare Pages Functions to process batch Excel imports (**STOCK.xlsx** and **PRICE LIST.xlsx**), inserting parsed rows into the database in rapid transactions.
- Implemented real-time debit/credit sales ledgers and chassis number matching features to auto-calculate accessories, helmet charges, and RTO taxes, ensuring 100% mathematical accuracy.
- Designed clean database schemas with optimized relational indexing in Supabase (PostgreSQL), reducing transaction times under peak loads of **5,000+ monthly receipt generations**.

Commflow — Internal Communication Platform | [LINK](#)

May 2026 – May 2026

- Architected a dynamic, glassmorphic internal communication portal using **React.js**, **TypeScript**, **Tailwind CSS**, and **Supabase** for enterprise-level data synchronization.
- Created an advanced real-time message broadcasting and ticketing system featuring visual status indicators (pending/resolved) and fluid haptic-glow transitions.
- Optimized client-side rendering and static asset delivery, delivering a high-fidelity and satisfying user experience for **30+ daily active users** with minimal latency.
- Secured API endpoints and database tables using row-level security (RLS) policies and authentication schemes, preserving strict organizational communication privacy.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, React, Bootstrap, Material UI

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Redis, Hono

Developer Tools: Git, GitHub, Postman, VS Code, Netlify, Vercel, Cloudflare Pages

Database: MongoDB, MySQL, Firebase, Supabase

Languages: JavaScript(ES6+), TypeScript, Java

CS Fundamentals: Data Structures & Algorithms, OOPS

ACHIEVEMENTS

Student Coordinator at ISCMCTR 2024 & 2025 - Supported logistics, media coordination, and attendee management for national-level technical conferences organized by MITS Gwalior.

Core Team Member of AARUNYA 2025 - Contributed to planning, scheduling, and execution of the annual techno-cultural fest attended by 1000+ students.

DSA Excellence – Solved 200+ data structure and algorithm problems across LeetCode and GFG, strengthening problem-solving speed and boosting coding-round readiness.
